

DATA DRIVEN PLATFORM

Foundation

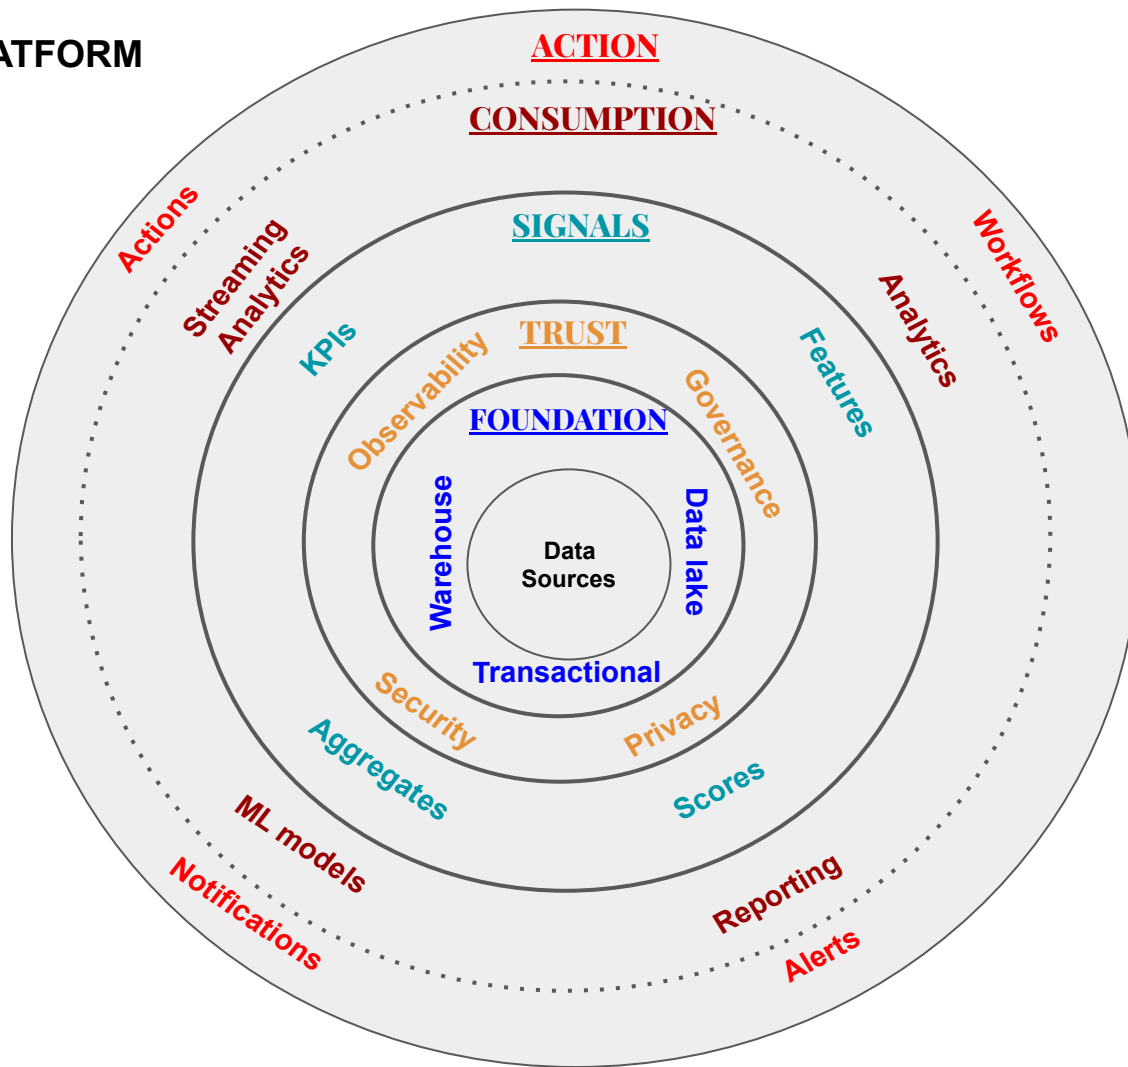

Data sources, Data constraints,
Decide on data architecture.

Trust

ACL,
Role based access,
Lineage & traceability, PII,
Anonymization.

Observability

Data drift,
Model-observability,
Anomaly detection,
Missing values.

Democratize data

Business user,
Business analyst,
Data Scientist

Consumption

Exploratory data analysis,
Widgets.

Signals

Feature store to be used across models.

Action

User driven or rule-based supported by XAI.
